EDUCATION

California Polytechnic State University, San Luis Obispo

September 2021 – June 2025

Bachelor of Science in Software Engineering

- **Honors:** Dean's Honor Roll (2022, 2024), College Track Scholar (2018 – Present), 3x SHPE Scholarship Recipient (2022 – 24)
- **Relevant Courses:** Data Structures, Algorithms, Software Engineering I & II, Systems Programming, Distributed Computing, Database Systems, Mobile App Development

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, HTML, CSS, SQL, C, Kotlin

Frameworks/Libraries: React.js, Vue.js, Spring Boot, React Native, Expo, Express.js, Flask, Jest, Mockito

Tools/Platforms: Git, Node.js, Yarn, Docker, Gradle, MongoDB, PostgreSQL, Unix/Linux, Postman, Travis CI

PROFESSIONAL EXPERIENCE

Gradient Comfort

San Francisco, CA

Embedded Systems Intern

June 2025 – August 2025

- Automating hardware integration testing by implementing Travis CI pipeline triggered on pull requests, eliminating 75% of manual QA effort and doubling test efficiency

Hack4Impact

San Luis Obispo, CA

Software Developer

January 2025 – June 2025

- Improving user engagement and event discoverability by building an announcements panel and expanding event management features using full-stack technologies (TypeScript, Next.js, React.js, and MongoDB)

Software Developer

October 2023 – June 2024

- Enhanced operational efficiency for a local nonprofit by developing a full-stack solution for volunteer scheduling and scholarship management using TypeScript, Next.js, React.js, and MongoDB

Banyan Infrastructure

San Francisco, CA

Software Engineering Intern

June – August 2024

- Secured client access and enabled eSignature integration by implementing DocuSign OAuth 2.0 using token-based authorization and session persistence, allowing seamless authentication within the platform
- Streamlined document workflows by integrating DocuSign APIs to automate envelope creation, track status via webhooks, persist envelope metadata, and retrieve signed documents for platform use

Software Engineering Intern

June – August 2023

- Automated core documentation processes by developing REST APIs using Java and TypeScript, reducing manual effort and improving internal teams' efficiency
- Maintained UI consistency and accessibility by implementing and styling interactive features in Vue.js

PROJECTS

Clothing Recognition AI

February 2026 – Present

- Developing a program that uses computer vision and artificial intelligence to detect and classify clothing items from live camera input

Q2S Staff – CLIENT: Cal Poly, College of Engineering

October 2024 – June 2025

- Implemented repository, service, and controller layers in a Spring Boot application to handle staff and student request flows, aligning with the project's layered architectural pattern

Bathroom Finder – Cal Poly

January 2024 – June 2024

- Developed TypeScript controllers in React Native to fetch and filter bathrooms from a Node.js/MongoDB backend, enabling real-time data integration in mobile components
- Tested controller logic using Jest and mocking API responses to verify data retrieval and error handling

Personal Portfolio

October 2023 – Present

- Deployed a full-stack portfolio website through Vercel using Java, React.js, Node.js, and MongoDB to showcase projects, featuring an integrated email contact form via EmailJS and a blog with commenting capacity
