

KAYLA TRAN

San Francisco, CA • kaylatran2021@gmail.com • 415-730-1406 • <https://github.com/kaylantran>

EDUCATION

Bachelor of Software Engineering, California Polytechnic State University - San Luis Obispo 2021 - 2025
Honors: Dean's Honor Roll (2022, 2024), College Track Scholar (2018 - 2025), 3x SHPE Scholarship Recipient

SKILLS

Programming Languages	Python, Java, JavaScript, TypeScript, HTML, CSS, SQL, C, Kotlin
Frameworks/Libraries	React.js, Vue.js, Spring Boot, React Native, Express.js, Flask, Jest, Mockito
Tools/Platforms	Git, Node.js, Yarn, Docker, Gradle, MongoDB, PostgreSQL, Travis CI

EXPERIENCE

Embedded Systems Intern Jun - Aug 2025
Gradient Comfort *San Francisco, CA*

- Architected a Travis CI pipeline to automate hardware integration testing on PRs, eliminating approximately 5 hours of manual execution per developer weekly
- Leveraged Redis as a message broker to manage state across 3+ concurrent pipeline processes, isolating blocking I/O to ensure reliable hardware control

Software Engineering Intern Jun - Aug 2024
Banyan Infrastructure *San Francisco, CA*

- Secured client access by implementing DocuSign OAuth 2.0 using token-based authorization and 24-hour session persistence, allowing seamless authentication and eliminating redundant daily logins
- Streamlined document workflows by integrating 10 DocuSign APIs to automate envelope creation, track status via webhooks, persist envelope metadata, and retrieve signed documents for platform use

Software Engineering Intern Jun - Aug 2023
Banyan Infrastructure *San Francisco, CA*

- Eliminated knowledge-retrieval bottlenecks by deploying a Vue.js and REST API discovery tool that served as the source of truth for 20 metric definitions across 7 departments

SERVICE & CIVIC ENGAGEMENT

Campus Outreach CollegeCorps Fellow Sep 2022 - June 2025
Cal Poly AmeriCorps Program *San Luis Obispo, CA*

- Founded and led a campus climate club in partnership with San Luis Obispo Climate Coalition, a local nonprofit, hosted informational sessions, activities, and field trips averaging 10+ students per meeting

Software Developer Oct 2023 - Jun 2025
Hack4Impact

- Built full-stack features for two local nonprofits including volunteer scheduling, scholarship management, and event discovery tools using TypeScript, Next.js, React, and MongoDB

PROJECTS

Transfer Learning Image Classifier | OpenCV, TensorFlow, Keras, MobileNetV2 Feb 2026 - Present
• Developing an image classification model by fine-tuning a pre-trained MobileNetV2 network, optimizing the architecture with custom dense layers to classify specific clothing items against background noise

Q2S Staff | TypeScript, Java, Docker, Spring Boot, PostgreSQL Oct 2024 - Jun 2025
• Designed the relational database, mapping 5+ PostgreSQL entities for the backend of an academic advisor portal, implementing a Spring Boot layered architecture to facilitate an institutional system transition

Bathroom Finder | TypeScript, React Native, Node.js, MongoDB Jan 2024 - Jun 2025
• Developed a cross-platform React Native application with custom Node.js controllers to query a MongoDB database for real-time location fetching and multi-parameter amenity filtering
